Updated World Bank figures for 2017 show that India is now the world's sixth-biggest economy, having muscled past France, which was pushed to the seventh spot, news agency AFP reported on Wednesday. India's gross domestic product (GDP) stood at \$2.597 trillion at the end of 2017, compared to \$2.582 trillion for France. The US continued to be the world's biggest economy, followed by China, Japan and Germany. Britain remained the world's fifth-biggest economy with a GDP of \$2.622 trillion at the end of 2017.

The finance ministry said India's economy would clock 7.5 per cent growth in 2018-19, the upper range of growth projected by the Economic Survey.
